

Debasish Ghosh

Kolkata, West Bengal, India | Phone: +91 8388817018 | Email: debasishghosh20032025@gmail.com
LinkedIn: linkedin.com/in/debasish-ghosh-440730315 | GitHub: github.com/debasishghosh-lab

Professional Summary

Computer Science undergraduate specializing in AI & ML with hands-on experience building and deploying ML applications using Python, TensorFlow, Scikit-learn, React, and Flask. Skilled in NLP, computer vision, cloud deployment, REST APIs, and n8n automation.

Education

Sister Nivedita University, Kolkata B.Tech in CSE (AI & ML), CGPA: 9.22/10	2023 – 2027
Nanoor C.M. High School Higher Secondary (WBCHSE): 88.4%	2021
Pakurhans Adarsha Vidyapith Secondary (WBBSE): 87%	2019

Experience

Azure DevOps Trainee <i>Employability.life (XPro Project)</i>	Jan 2026 <i>Remote</i>
- Completed hands-on training in Microsoft Azure covering cloud services, virtual machines, storage, networking, and deployment. - Collaborated in an Agile team, participating in sprint planning, daily stand-ups, task tracking, and project delivery. - Led a 2-week sprint as Team Lead, coordinating task allocation and tracking progress for timely delivery. - Gained practical experience with Git, DevOps workflows, collaboration tools, and the software development lifecycle (SDLC).	

Projects

FIFA World Cup 2026 Player Analytics <i>Python, Playwright, Scikit-learn, PCA, K-Means, Streamlit</i>	Live GitHub
- Developed an end-to-end football analytics platform by scraping and processing 1,200+ FIFA World Cup 2026 player records across 8 statistical categories using Playwright, with an automated ETL pipeline for data extraction, cleaning, and preprocessing. - Engineered player performance features using PCA for dimensionality reduction, leveraged K-Means clustering to identify player archetypes, and built an interactive Streamlit dashboard featuring player search, similarity analysis, radar visualizations, and country-wise analytics.	
AI Sales Roleplay Bot <i>React, FastAPI, TypeScript, OpenRouter</i>	Live GitHub
- Developed an AI-powered sales training platform enabling realistic voice and text roleplay with configurable customer personas by integrating React, FastAPI, OpenRouter LLMs, and the Web Speech API for interactive conversations. - Engineered an automated evaluation pipeline that analyzes conversation transcripts, generates evidence-based coaching reports, scores performance across 8 sales skill categories, and visualizes insights through radar charts, score dashboards, and improvement recommendations.	
AI Lead Profiling System <i>React, n8n, OpenRouter, Google Workspace</i>	Live GitHub
- Developed an AI-powered lead qualification platform that captures website visitor data, tracks browsing behavior, and orchestrates an end-to-end automation pipeline using n8n, enabling real-time lead classification with LLMs. - Integrated OpenRouter, Google Sheets, and Gmail within an event-driven webhook workflow to classify leads, maintain structured CRM records, and automatically notify the sales team, eliminating manual lead triaging.	
English to Bengali Neural Machine Translator <i>Python, TensorFlow, Keras, LSTM, Seq2Seq, NLP</i>	GitHub
- Developed a Seq2Seq neural machine translation model using an Encoder–Decoder LSTM architecture to translate English sentences into Bengali, incorporating tokenization, padding, and vocabulary preprocessing. - Built an end-to-end NLP pipeline with teacher forcing for training and sequence decoding for inference, demonstrating practical sequence-to-sequence learning for neural machine translation.	

Technical Skills

Programming Languages: Python, JavaScript, C++, C
Machine Learning: TensorFlow, Scikit-learn, Keras, Supervised Learning, Unsupervised Learning, Transfer Learning
Natural Language Processing: TF-IDF, Tokenization, Seq2Seq Models, Encoder–Decoder, Teacher Forcing
Automation & APIs: n8n, Workflow Automation, REST APIs, GitHub REST API
Web Development: React, Flask
Data Science: NumPy, Pandas, Matplotlib, Jupyter Notebook, Google Colab
Tools & Platforms: Git, GitHub, VS Code, Render, Vercel, Microsoft Azure
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Certifications

XPro Project: DevOps – Azure DevOps Initiatives – Employability.life & Federation University (Jan 2026)
Introduction to Artificial Intelligence – IBM
Python (Basic) – HackerRank
Data Structures and Algorithms – University of Colorado Boulder
